

# Corn Analysis Guideline

\* Minimum plant height 4". As the best time for stand count Agremo suggests V3 to V6 growth stage of corn. Could be done later (to R6) upon request.

\*\* Includes a potential Green snap or Brittle snap of a corn plant which is highly sensitive to stalk breakage in the vegetative (V5-V8 and V12-V18). Could be done later (to R6) upon request.

\*\*\* Ground image of dry plant is necessary
